

GLAS FILAMENT TAPE - MONO

Technical data sheet

CROSSWEAVE GLASSFIBER FILAMENT MONO REINFORCED TAPE

Characteristics:

This tape is a multipurpose tape, mainly used as a packaging tape with an extreme tension strength. Besides that the tape is also used as a bonding tape for foam glass pipe sections to hold them together in the process of installation. Either as double or single glass filament tape available. Data below correspond to MONO/single version.

- Available colours: clear-white

Standard dimensions:

Length: 50 m

Width: 19, 38, 50, 75, 100 mm

Construction:

- Backing: glassfiber laminated BOPP / Mono
- Adhesive: Synthetic rubber / resins clear adhesive

Technical data:

Property	Norm	Unit	Value
Total Thickness	AFERA 5006	µm	120
Total Weight	ISO 536	g/m ²	115
Elongation at break MD	AFERA 5004	%	< 10
Tensile strength MD	AFERA 5004	N/cm	> 200
Adhesion to steel plate	AFERA 5001	N/cm	> 4,5
Rolling ball tack	PSTC 6	cm	< 5

Our products are the result of fundamental research. They correspond to the latest technical standard. For their useful application we give data and technical information to the best of our knowledge but, however, without any warranty. In special cases the user shall make his own tests to determine the suitability of the products for his purpose.
